MALTAWARD

Standalone Wireless CCTV Systems

SPECIFICATION SHEET

Maltaward offers standalone wireless camera systems as a security solution for vacant properties. Complementing our range of concrete barriers and void property security solutions, our CCTV systems help to deter intruders as well as preventing theft and vandalism. Our systems feature automatic detection of intruders or attempted theft, with cameras deploying automated sirens and voice-warnings. The cameras are remotely monitored so that security can be dispatched to the site as soon as possible.

MALTAWARD

Standalone Wireless CCTV Systems

We are now offering a new Wireless Standalone Camera System with a greater range of benefits. Rather than being tower-mounted, these cameras can be placed in a variety of locations such as a fences, buildings and posts. This gives the site a more flexible surveillance coverage to include areas where a tower may have restricted views. The cameras are standalone and wireless, so they can be placed anywhere across your site without having to worry about how they need to be wired.

Vacant property can be easy targets to trespassing and are often vulnerable to high volume fly tipping. Construction sites can have high value equipment and materials unsupervised whilst the site is closed. A CCTV camera system can monitor your site to deter intruders and dispatch security when necessary.

We offer both wireless cameras and CCTV towers. The right choice for your site will depend on your needs and requirements. Our team of professionals can provide you with advice and guidance.

Get in touch with our expert team today to discuss your specific requirements, or email for a free quote.
