

**MALTAWARD**

## XL Interlocking Concrete Blocks

### SPECIFICATION SHEET

Maltaward (Barriers) Ltd specialise in the supply of various types of concrete barrier solutions. Interlocking Concrete Blocks are ideal for use as a demarcation block (no need to fill with water and will not leak!). They are ideal for building free standing walls or for forming aggregate bays. Easily stacked and robust they are a quick and stable walling solution.

# MALTAWARD

## XL Interlocking Concrete Blocks

These large concrete blocks are ideal for constructing temporary buildings – such as storage bays – barricades, security/retaining walls, and more. The interlocking blocks are easy to work with and come in a wide range of standard sizes. If you need something more bespoke, we can also tailor blocks to your specific measurements.

Interlocking concrete blocks are high strength interlocking concrete blocks that can be used to manage vehicle and pedestrian access at your premises as well as being ideal for building custom storage bays and security barriers.

Get in touch with our expert team today to discuss your specific requirements, or email for a free quote.

Blocks can be lifted and installed into place quickly using standard construction lifting equipment such as small cranes and forklifts. The interlocking mechanism of the blocks means each one fits together smoothly – and won't become displaced accidentally.
